### **move technology and Swagelok Leipzig | Berlin Sign Memorandum of Understanding to Further Develop HYDROGENGALAXY**

As part of the product development of HYDROGENGALAXY, move technology GmbH has signed a Memorandum of Understanding (MoU) with Swagelok Leipzig | Berlin, B.E.S.T. Fluidsysteme GmbH. The aim of the collaboration is to integrate practical expertise from hydrogen technology into the digital learning platform HYDROGENGALAXY, thereby further strengthening knowledge transfer around hydrogen technologies.

move technology and Swagelok Leipzig | Berlin, B.E.S.T. Fluidsysteme GmbH already presented the first prototype of HYDROGENGALAXY together at Hannover Messe. With the now formalised collaboration, the existing partnership is being further specified and developed.

As an experienced partner from industry practice, Swagelok contributes specialist content, technical know-how and application-oriented perspectives to the development of the hydrogen learning platform. These contents will be integrated into the knowledge base of the platform AI and the 3D avatar, as well as into the learning and information areas. As a result, users will benefit even more from up-to-date, realistic and technically sound information in the future.

HYDROGENGALAXY is a digital learning and knowledge platform that makes complex hydrogen knowledge accessible in an interactive, understandable and practice-oriented way. To ensure that the platform remains technically reliable, up to date and closely aligned with real-world applications, collaborations with experienced industrial partners are a strategic component of its content development. The aim is to combine theoretical knowledge with practical experience and to prepare content in a way that not only informs, but also makes concrete connections from hydrogen practice comprehensible.

*The project is funded by the European Social Fund Plus (ESF Plus) and by tax revenues on the basis of the budget adopted by the Saxon State Parliament.*

#### **About move technology GmbH**

move technology is a specialized service provider and solution partner that supports its clients with a holistic approach in the future fields of green energy and smart AI applications. The company relies on three core business pillars: consulting, the realization of projects and concepts including engineering and software development, and the creation of its own products. From strategic study to successful international market launch, move technology offers comprehensive industry expertise for high-tech projects, including sustainable mobility concepts, tailor-made software development, and the design of modern energy systems. The development and global scaling of its own products further accelerates the transition to environmentally friendly energy and more efficient processes.

Through this commitment, move technology strengthens its clients' competitiveness and makes a substantial contribution to global CO<sub>2</sub> reduction and the realization of the Sustainable Development Goals (SDGs).
