### **move technology expands its consulting and conceptualization services for municipalities and cities**

move technology GmbH is pleased to announce the immediate availability of customized services specifically for municipalities and cities. This new offering builds on move technology's proven consulting and conceptualization portfolio and addresses the specific needs of municipalities, especially with regard to the energy and mobility transition.

“Our extensive experience in the implementation of sustainable projects, coupled with in-depth technological expertise, enables us to effectively support municipalities in overcoming the challenges of the modern energy industry and sustainable mobility. From analysis and strategic planning to concrete implementation, we offer comprehensive solutions that are tailored to the individual requirements of each municipality,” says Dr. Jörn Seebode, Managing Director of move technology.

move technology offers the following services, among others:

- Optimization of municipal vehicle fleets: analysis of current and future requirements, CO<sub>2</sub> reduction scenarios and support in the evaluation and implementation of optimization concepts.
- Promotion of electromobility: advice on setting up an efficient charging infrastructure and selecting suitable implementation partners
- Preparing for the hydrogen economy: stock analyses, economic scenario calculations and support with the implementation of hydrogen solutions.

“Our customers benefit from individual support that is tailored to their specific conditions. Our practical approach ensures that every measure is not only planned, but also successfully implemented,” adds Tom George, Managing Director of move technology.

#### **About move technology GmbH**

move technology supports companies in challenging times and in high-tech projects. The range of services includes comprehensive consulting, project development and implementation for sustainable mobility, transport and energy solutions, as well as simulation and digitalization solutions. Specialties include the market readiness of innovative technologies and hydrogen projects in an international context. Customers are supported throughout the entire product process, from conceptualization to market launch. move technology develops its own products and scales them worldwide with partners.

move technology contributes to global CO<sub>2</sub> reduction by developing and implementing sustainable mobility and energy solutions. Hydrogen technology and green projects help companies to reduce their CO<sub>2</sub> emissions and accelerate the transition to more environmentally friendly energies.
