move technology now a member of Energy Saxony

move technology GmbH announces its membership of Energy Saxony e.V. As a leading company in the field of sustainable energy solutions and innovative technologies, move technology plans to make a significant contribution to accelerating the energy transition in Saxony through this collaboration.

By becoming a member of Energy Saxony, move technology expects to further increase the added value for its customers through networking and joint projects. The company's innovative products and services are designed to support the transition to a CO₂-reduced economy. The solutions offered include:

- Green energy systems: Customizable solutions for sustainable energy supply.
- Hydrogen technology: Advanced systems for using hydrogen as an energy source.
- Green mobility: Development of environmentally friendly mobility concepts and products.

About move technology GmbH

move technology is an innovative consulting and product development company in the field of green tech and mobility. The company supports its customers in challenging times and in high-tech projects. The range of services includes comprehensive consulting, project development and implementation for sustainable mobility, transport and energy solutions, as well as simulation and digitalization solutions. Specialties include the market readiness of innovative technologies and hydrogen projects in an international context. Customers are supported throughout the entire product process, from conceptualization to market launch. move technology develops its own products and scales them worldwide with partners.

move technology contributes to global CO₂ reduction by developing and implementing sustainable mobility and energy solutions. Hydrogen technology and green projects help companies to reduce their CO₂ emissions and accelerate the transition to more environmentally friendly energies.

About Energy Saxony e.V.

Energy Saxony (<https://energy-saxony.net>) is a network dedicated to the promotion and implementation of innovative energy solutions in Saxony. The network brings together companies, research institutes and public institutions to jointly develop and promote sustainable and forward-looking energy technologies.
